

Construction of the Taylors Lane Sewer Extension is being financed by the New Jersey Environmental Infrastructure Financing Program (NJEIFP). The construction cost of this project is \$323,950. The NJEIFP is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Environmental Infrastructure Trust (Trust) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Trust to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by eliminating groundwater discharges from septic systems from residents and businesses along Taylors Lane.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
