1621 RIVERTON RD.
CINNAMINSON, NJ 08077
856-829-5287**

**Rules/Regulations for Secondary Meters
Part One Rules and Rates
Section I, Definitions and Schedules**

The Cinnaminson Sewerage Authority will provide a credit to customers who install a second meter to measure excess water usage for watering lawns, gardens filling pools, and general outside watering.

If customers install or replace a second meter, it must be **clearly marked** "Second Meter" and allow visual reading of the meter from the exterior of the building. The meter must be stationary and cannot be removable. The Authority **must** be notified of the installation and location of the meter. Authority personnel shall inspect the meter and touch pad to verify starting numbers and compliance with this rule. The **resident** is responsible for the installation, repairs and maintenance so that the meter is recording properly and readily accessible to CSA personnel for readings. If a customer installs a noncompliant meter, they shall **not** receive a credit.

Readings for secondary meters must be taken once per year or the homeowner will lose credit for previous years the meter remained unread.

In the event of extreme water usage during the autumn, an additional reading may be ordered upon the homeowner's request. The homeowner may call in November or December and request this reading.

A charge of \$10.00 will be assessed for each meter reading.
