Converting your JPG into a PDF is simple once you learn your way around your iPhone.

1. **Open your iPhone Photo app** and find the photo you want to PDF.
2. **Select the photo** and click the Share icon.
3. **Choose the Print option** (it should be at the bottom of your options list)
4. **Zoom in** on your photo; this opens your image in a PDF viewer.
5. **Tap the Share icon** again once you're in the PDF viewer.
6. **Save it** to your iPhone files.
7. **Send along** your PDF image with the assurance that the quality, coloring, and other important properties will translate.
